Hi Diana,,

I know you always do what you can and know I appreciate your constant help.

On the other hand, the system needs to evolve to improve accuracy to ensure the anchor address being used at least is in the polygon and appears on the appropriate CD AMS sheet.

Ill be submitting my location is a few minutes.

Thanks,

Hi Jose,

Unfortunately, we cannot control these functions when creating the authorizations. I have contacted our system support team to see if this is something we can fix or upgrade.

Please find polygon below for 3066 Leeward St.

As we discussed earlier, I do not have a problem with sending you polygons for authorizations, so that this doesn't happen again.

Thank you so much!

Hi Diana,

I dont get it.

How can the anchor address that is in CD1 be used to create an authorization that falls in CD10.

This is the same issue we discussed earlier.

2076 Wilshire anchor address is in CD1 and the clean we had done was all in CD10. All the HEs in front of 2706 Wilshire were not even in the polygon.

This is ridiculous.

Pls send me the polygon for Leeward.

Hi Jose,

I believe this is in the border of CD10 and CD1 correct?

It is popping up as CD10 in AMS. However, I can still schedule this location under CD 1 priorities.

Please advise.

Thank you so much!
